

# SUMMER SCHOOL on HUMAN OLFACTION 2019

July 28<sup>th</sup> to August 2<sup>nd</sup>, of 2019, in Dresden, Germany.

Contact Thomas Hummel, M.D., [thummel@mail.zih.tu-dresden.de](mailto:thummel@mail.zih.tu-dresden.de)

**Aim:** The conference is meant to provide an informal platform for scientific exchange between established scientists and younger researchers in the fields related to chemosensation. In addition, it is meant to provide participants with up-to-date knowledge on various aspects of the human chemical senses not only through seminars - there will be a strong focus on practical demonstrations and experiments.

**Fee for participation is 330 Euro.** Participants with an industrial background pay 1000 Euro. This fee covers conference dinner at Schloss Eckberg, a barbecue, a guided city tour, and an excursion to the surroundings of Dresden. **The number of applicants will be limited to 32.**

**Deadline** for registration is the **1st of June 2019.**

## Lecturers include

**Maria Larsson** (Stockholm, Sweden) - cognition, odor memory  
**Matthias Laska** (Linköping, Sweden) - chemosensory discrimination  
**Steven Nordin** (Umea, Sweden) - Environmental Chemosensory Hypersensitivity  
**Christian Margot** (Geneva, Switzerland) - structure-odor relations  
**Silvain Lacroix** ( Geneva, Switzerland ) - neurogenic inflammation of the nasal mucosa  
**Nancy Rawson** (Philadelphia, PA, USA) - Olfactory cell biology in health and disease  
**Bettina Pause** (Duesseldorf) - Chemosensory Communication  
**Martin Witt** (Rostock, Germany) - morphology of human olfaction  
**Basile Landis** (Geneva, Switzerland) – nasal physiology  
**Benoist Schaal** ( Dijon, France ) - chemosensory development  
**Charlotte Sinding** (Dijon, France) – odor mixtures  
**Antje Hähner** (Dresden, Germany) - neurodegeneration  
**Thomas Hummel** - evoked potential olfactometry, recordings from the mucosa  
**Ilona Croy** – olfaction and depression  
**Valentin Schriever** – olfaction in childhood

In addition to the demonstrations/experiments given by/performed together with each of the lecturers, among others there will be practical demonstrations of endoscopy of the nasal cavity , rhinomanometry, blood flow, acoustic rhinometry, recordings of electro-olfactograms, recordings of event-related potentials, and clinical aspects of olfactory dysfunction (diagnosis, treatment).
