

Scientific advisory board / Information

Who is organising the Symposium?

Mario Rüdiger
Lars Mense; Marius Möbius; Falk Eckart

- **Scientific advisory board – Regenerative Therapies**
Bernard Thebaud (Ottawa)
- **Scientific advisory board – DR-management**
Elizabeth Foglia (Philadelphia); Arjan te Pas (Leiden); Charles Christoph Roehr (Oxford); GNPI Task force neonatal resuscitation
- **ESCNR – Young Investigator Price**
GNPI GNPI Task force neonatal resuscitation (Laila Springer, Michael Wagner, Christoph Rügger, Lukas Mileder, Maxi Kaufmann, Vincent Gärtner)

You are invited to actively participate in

- **Presentation of a case or SOP**¹
Register at: Dresden@neolink.de
- **Discussing your stem cell research**¹
Register at: sabine.resch@ukdd.de
- **Video of DR-management**²
Register at: Dresden@neolink.de
- **presenting results of your research**²
Details of application will be announced at www.ukdd.de/fetoneoSymposium. The audience will select the best presentation by vote.
- **Meeting the expert**
To have the session as productive as possible, there will be a maximum of 10 participants per expert group.
Therefore, please register early!
Register at: sabine.resch@ukdd.de

Further information can be found at www.ukdd.de/fetoneoSymposium or by mail sabine.resch@ukdd.de

¹ If you present your case or SOP we will cover your registration fee.

² If you are chosen to present a video or your research we will cover registration fee and will arrange accommodation for 2 nights.

³ Additional 40 € have to be charged for payment after 1st of March 2020.

Registration / Location / Travel

How to register?

The number of participants is restricted to 150.

Thus, a registration is required.

Please register by E-Mail at: sabine.resch@ukdd.de

Tel.: +49 351 458-3640

What to pay for participation?

If you register until January 30th, 2023 there will be a charge of 120 €, thereafter of 150 €. Furthermore, there will be a separate charge for ESPR-course on Saturday.

To be paid after receiving confirmation of registration at:

Name of beneficiary: Carl Gustav Carus Management GmbH

Bank: Deutsche Kreditbank AG

IBAN: DE 71 1203 0000 0011 248 333

BIC: BYLADEM1001

Password: TEST-APGAR

What about CME credits?

Participants will get CME credits from the „Sächsische Landesärztekammer“.

What is the language, is the Symposium on the web?

Presentations are given in English only.

A live presentation of the symposium via internet is planned for participants who cannot come to Dresden.

Where is the Symposium held?

Medical-Theoretical Centre (MTZ), Building 91, Faculty of Medicine Carl Gustav Carus, Technische Universität Dresden; Fiedlerstr. 42, 01307 Dresden

How the Symposium can be reached?

By Train: Dresden Neustadt ▶ Tram 6 to Augsburger Strasse; Dresden Hauptbahnhof ▶ Tram 12 (Prager Strasse) to Augsburger Strasse

By Plane: Dresden Airport (from Munich, Frankfurt, Düsseldorf) ▶ S-Bahn to "Dresden Neustadt" ▶ Tram 6 to Augsburger Strasse; or to Berlin-Schönefeld/Tegel and by train or bus (2 hours)

By Boat: Dresden is situated on the river Elbe, thus you can use your Yacht.

14th Dresden Symposium

on Delivery Room Management
and Regenerative Therapies together with

ESPR-Spring School

9th – 11th of March 2023

European Society
for Paediatric Research

A joint meeting of the
European Society for Paediatric Research (ESPR)

with European Collaboration of Neonatal
Resuscitation (ESCNR), MASC-Prematurity task force
and Department for Neonatology and Pediatric
Intensive Care Medicine

Saxony Center for Feto-neonatal Health
University Hospital C. G. Carus, Dresden, Germany

Saxony Center
for Feto/neonatal
Health

Invitation

Dear friends and colleagues,

with great pleasure we invite you to our **14th annual „Dresden Symposium“**, the ESPR spring school.

The meeting in March has become the kick-off for the academic year of clinicians and researchers who are interested in improving care of new-borns. During the past decade, we had the honour to host many dear friends and colleagues in Dresden and to provide an atmosphere for scientific exchange.

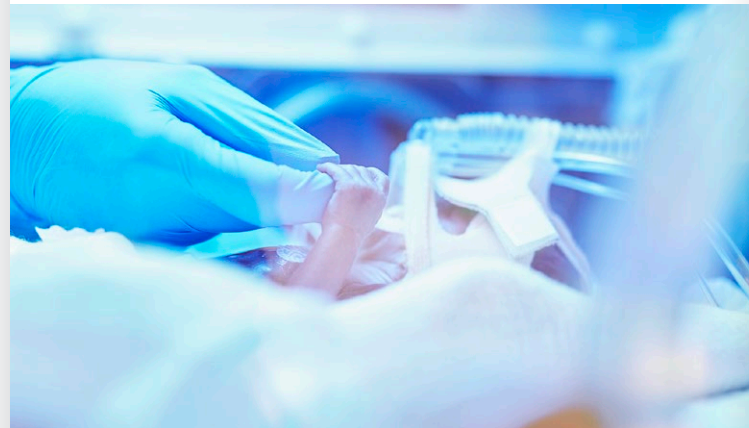

In order to cope with the current situation, we currently plan to have the meeting in 2023 within a hybrid setting. We would be very happy if we can welcome you in person in Dresden. As already introduced a decade ago, we will also provide online access for participants who are not able to come. We hope to keep the spirit of the meeting alive and to provide a platform for intensive exchange between clinicians and scientists who are interested in Delivery Room Management and in new developments in neonatology.

In order to cover a broad range of relevant topics we have invited speakers to cover the following topics:

- How to treat the intra-uterine child and the extra-uterine fetus.
- Recent advances on stem cell research and on the treatment of asphyxiated infants.
- Does technique help to improve DR-management?
- What to expect from the next few years?
- What is the best way to teach delivery room management.
- Young investigators present their research projects.

European Society
for Paediatric Research

The programme is divided into two parts: on Thursday and Friday, you will have the opportunity to attend cutting-edge lectures in Delivery Room Management and new approaches in Neonatology. On Saturday, the highly-interactive ESPR courses offer a chance to young clinicians from different parts of the world on pertinent to optimal perinatal management and quality improvement. You will find more details at www.ukdd.de/fetoneoSymposium.

As always, we are interested to provide the opportunity for intensive discussions. Therefore, we restrict the meeting on Thursday and Friday in person to 150 participants. If you **register until January 30th, 2023** there will be a **charge of 120 €, thereafter of 150 €**. Furthermore, there will be a **separate charge for ESPR-course** on Saturday. There will be no charge for online participants, however, you are required to register at sabine.resch@ukdd.de. If you are not available, you will have the chance to watch the recording of the meeting thereafter.

Together with the GNPI-neonatal resuscitation group we are looking forward to seeing you in March 2023 in Dresden

Mario Rüdiger

Arjan te Pas

Charles Christoph Röhr

Short Programme

The Future of Feto-Neonatal Health

Thursday, 9th of March 2023

Advances in improving feto-neonatal Health are discussed from different perspectives: Consequences of feto-neonatal development on our care, international initiatives to improve care, current data on treatment of perinatal asphyxia and finally current results and challenges associated with clinical application of stem cells in different patient groups.

In the evening you are cordially invited to meet our experts and join our BYO dinner. We will offer some food and you are invited to bring some local food or drinks from your home-town to share it with your colleagues.

Delivery Room Management

Friday, 10th of March 2023

Distinguished speakers will present current knowledge on delivery room management. We will discuss recent results of research and will get an impression on how technique will help to improve DR-management.

If you are a young investigator, please submit your abstract **until January, 31** in order to present your data and win the Young investigator award. For further details please look at www.ukdd.de/fetoneoSymposium.

ESPR courses on pertinent to optimal perinatal management and quality improvement

Saturday, 11th of March 2023

Use the chance to learn more about delivery room management. In small groups you have the unique chance to train your skills and discuss management with distinguished experts.

If you are interested, please register at: sabine.resch@ukdd.de. Further information will be regularly updated and can be found at www.ukdd.de/fetoneoSymposium

Preliminary Programme

The Future of Feto-Neonatal Health

Thursday, 9th of March 2023

9:00 am	Welcome to the 14th Dresden Symposium <i>Host (Rüdiger), ESCNR (te Pas), ESPR (Roehr)</i>
9:15 am – 11:00 am	The intra-uterine child and the extra-uterine fetus Distinguished speakers focus on feto-neonatal development and discuss consequences for our care. <i>Mense / Dresden</i>
9:15 am – 9:35 am	Pharmacology of the placenta and the fetus <i>Simons / Rotterdam</i>
9:40 am – 10:00 am	Fetales Hb – does it matter? <i>Reiss / Rotterdam</i>
10:05 am – 10:25 am	BPD – more than inflammation? <i>Möbius / Dresden</i>
10:30 am – 10:50 am	MR Imaging of Prematurity-related Lung Disease in Children and Neonates <i>Stewart / Sheffield</i>
11:00 am – 11:30 am	Break and exchange with companies Use the time to get a coffee and to talk with different companies.
11:30 am – 12:45 pm	How to improve care of the extra-uterine fetus? Experts re-focus our view on the preterm infant and describe initiatives on how to improve care. <i>Roehr / Bristol</i>
11:30 am – 11:45 am	Resuscitation of extremely immature infants (22 – 25 wks.) – Seeking Clarity in the Gray Zone <i>Foglia / Philadelphia</i>
11:50 am – 12:05 pm	Red blood cells and platelet transfusions for preterm neonates: Panacea or Trojan horses? <i>Lopriore / Leiden</i>
12:10 pm – 12:25 pm	Intra- and extra-uterine head growth – how to monitor head deformities <i>Burkhardt / Dresden</i>
12:30 pm – 12:45 pm	The situation in Ukraine – How can we help? <i>Petrashenko / Sumy</i>
12:45 pm – 1:45 pm	Break and lunch Use the time to get lunch and to discuss presentations with other participants and different companies.
1:45 pm – 2:15 pm	Key-note lecture Influence of chorioamnionitis – brainstem inflammation and injury in preterm newborns <i>tePas / Leiden</i>

Time is given as Central European Time

Preliminary Programme

The Future of Feto-Neonatal Health

Thursday, 9th of March 2023

2:20 pm – 3:40 pm	Asphyxia and Hypoxic Ischemic Encephalopathy Perinatal Asphyxia is still responsible for a major burden of disease in term infants. We will present the current status of therapeutic interventions. <i>Procyanoy / Brazil</i>
2:20 pm – 2:40 pm	Is there a need to treat infants with mild HIE? <i>Walsh / Cork</i>
2:45 pm – 3:05 pm	A structured SOP for Hypothermic treatment <i>Sabir / Bonn</i>
3:10 pm – 3:30 pm	Hypothermia – protocol driven care! <i>Kramer / Maastricht</i>
3:40 pm – 4:00 pm	Break Use the time to get a coffee and to discuss presentations with other participants and different companies.
4:00 pm – 5:30 pm	Exciting news from Stem Cell Research Stem cell therapy could be beneficial in order to treat or prevent neonatal diseases. Distinguished speakers will present results and challenges associated with clinical application of stem cells in different patient groups. <i>Möbius / Dresden</i>
4:00 pm – 4:25 pm	Intranasal mothers milk in infants with IVH – impact on spinal fluids proteom <i>Kribs / Köln</i>
4:30 pm – 4:55 pm	MSC to treat Sepsis / Covid <i>McIntyre / Ottawa</i>
5:00 pm – 5:25 pm	From an idea to an EMA approved product: stem cell therapy in spinal cord injury <i>Kramer / Maastricht</i>
5:30 pm – 6:00 pm	The Roland-R-Wauer Lecture and Award In memoriam of Professor Wauer the Roland-R-Wauer Award supports medical students to visit neonatal units throughout Europe to help experience first class neonatal research. The award is supported by the Deutsche Stiftung Kranke Neugeborene (DSKN) and the European Society for Paediatric Research (ESPR).
5:30 pm – 5:40 pm	Introducing the Award <i>Roehr / Bristol</i>
5:40 pm – 5:50 pm	Presentation of the ESPR
5:50 pm – 6:00 pm	Brigitte Wauer will nominate the winners for 2023
5:30 pm	Meet the experts in private and BYO-Dinner As in previous years you will have the chance to meet the experts. To make it more interactive, we will offer some food and you are invited to bring some local food or drinks to share it with your colleagues.

Preliminary Programme

Delivery Room Management

Friday, 10th of March 2023

9:00 am – Current studies on DR-management

11:00 am Management in DR depends very much on quality of scientific data. Distinguished speakers present recent data of clinical trials.

te Pas / Leiden

9:05 am – NEU-Stim – a pragmatic trial on stimulation

9:15 am *O'Donnell / Dekker*

9:20 am – Survey on Currently applied Interventions in Neonatal resuscitation (SCIN)

9:30 am

Kaufmann & Eckart / Dresden

9:35 am – Surfactant Nebulization for the Early Aeration of the Preterm Lung (SUNSET)

9:45 am

Gaertner / Munich

9:50 am – Synchronized non-invasive intermittent positive pressure ventilation as primary support for very preterm infants in the first ten minutes after birth-a pilot Study

10:00 am

Warth / Tübingen

10:00 am – Young investigator award

11:00 am Six junior scientist present their research in 5 minutes and discuss it with participants. Participants chose the best presentation and the most fascinating topic.

Springer & Wagner

11:00 am – Break and exchange with companies

11:30 am Use the time to get a coffee and to discuss presentations with other participants and different companies.

11:30 am – Key Note Lecture

12:00 pm Pregnancy and Birth in the animal world

Hildebrandt / Berlin

12:10 pm – Does technique help to improve DR-management?

1:00 pm

There are several technical developments which could help to improve management in the delivery room. Our speakers will give an overview on current developments.

Dekker / Leiden

12:10 am – Adaptive Virtual Reality Neonatal Resuscitation Training using cognitive load

12:25 am

Wagner / Vienna

12:30 pm – Quality of neonatal resuscitation and impact of interdisciplinary and interprofessional in situ simulation training

12:45 pm

Miledler / Graz

Preliminary Programme

Delivery Room Management

Friday, 10th of March 2023

12:45 pm – Developing a Delivery Room Video Collaborative
1:00 pm *Herrick / Philadelphia*

1:00 pm – Break and lunch
2:00 pm Meeting of SCIN collaborators

2:00 pm – What do expect from the next few years?
3:35 pm Speakers will give a look into future developments of delivery room management.
O'Donnell

2:00 pm – Oxygen use in the delivery room and Goldilocks rule:
2:20 pm Not too much, Not too Little, Just right!
Kapadia / Dallas

2:25 pm – Introducing DRIVE: a multicentre DR-network to
2:45 pm facilitate resuscitation research
Foglia / Philadelphia

2:50 pm – Artificial intelligence in neonatology
3:10 pm *Sharkey / Nottingham*

3:15 pm – Automatisatin in the delivery room
3:30 pm *Janneke Decker / Leiden*

3:35 pm – Break and exchange with companies
4:00 pm Use the final break to discuss presentations with other participants and different companies.

4:00 pm – Announcement of Young Investigator Award;
6:00 pm Multi-perspective Discussion and Video-
presentation
Kribs / Köln

4:00 pm – **Parental involvement**
4:45 pm Does early bonding in the DR have an impact on epigenetics?
Schömigh / Köln
How to inform parents prior to preterm delivery?
Springer / Tübingen

4:45 pm – **How to train neonatal resuscitation**
5:30 pm *Foglia / Philadelphia*

What is the evidence
Miledner / Graz

AAP vs. NLS
Madar / Plymouth

Resuscitation vs. Support of Transition
te Pas / Leiden

5:30 pm – Presentation of videos
6:00 pm

ESPR courses on pertinent to optimal perinatal management and quality improvement

Saturday, 11th of March 2023

Dear friends and colleagues,

it is a great pleasure to invite you to another edition of the Course-Saturday of ESPR-Spring School.

Despite the challenges of the current times, we are proud to offer you a great selection of courses pertinent to optimal perinatal management and quality improvement.

You will find the detailed programme below. As always, we are interested to provide the opportunity for intensive discussions. Therefore, we restrict the number of participants to 12 per course. The participation is free of charge for ESPR-members but there will be a participation fee of 20 Euro for non-ESPR members. All participants please need to register with Sabine.Resch@ukdd.de.

We are looking forward to seeing you in March 2023 in Dresden

Mario Rüdiger

Arjan te Pas

Charles Christoph Röhr

Preliminary Programme

9:00 am – 10:30 am: First session

- How to manage an extremely preterm infant in DR.
- Skills for Delivery room management.
- How to audit your management in the Delivery Room?
- Monitoring vital parameters in the Delivery Room.
- Intact cord stabilization with the Concord Birth Trolley (sponsored by Concord Neonatal)

10:45 am – 11:00 am: Coffee Break

You will have the chance to chat with other participants in the break.

11:00 am – 12:30 pm: Second session

- How to manage an extremely preterm infant in DR.
- Skills for Delivery room management.
- How to audit your management in the Delivery Room?
- Monitoring vital parameters in the Delivery Room.
- Intact cord stabilization with the Concord Birth Trolley

9:00 am – 11:30 am: Meeting of Scientific Working groups

Collaborators of research projects get the chance to meet and to discuss how to proceed with the project.

- Meeting of the NEU-stim collaborators.

Time is given as Central European Time

ESPR courses on pertinent to optimal perinatal management and quality improvement

Saturday, 11th of March 2023

How to manage an extremely preterm infant in the Delivery room?

At birth, extremely preterm infants require specialised support of their transition into ex-utero life. A gentle approach of delivery room management has been established locally through the last decade. Techniques, policies, data and experiences will be discussed and patient cases simulated in this workshop.

Lars Mense / Dresden

Skills for Delivery room management.

Delivery room management is crucial to provide an optimal start into neonatal life. Improving team performance will help to prevent mortality and morbidity in a high-risk population. You will see and discuss how to improve skills in the Delivery Room.

GNPI Task force neonatal resuscitation

How to audit your management in the Delivery Room?

Supporting postnatal transition or resuscitation of newborns requires an inter-professional team. Quality of your management in the Delivery Room is determined by a successful interaction of varying team members. A structured audit of your DR-management can help you to improve DR-management in your unit. You will learn how to introduce and sustain a successful auditing-process.

Veerle Heesters and Ruben Witlox / Leiden

Monitoring vital parameters in the Delivery Room.

Various devices are available to monitor vital parameters of the Newborn. You will discuss recent advances in monitoring heart rate and oxygen saturation.

Arjan te Pas / Leiden

Intact cord stabilization with the Concord Birth Trolley.

The timing of umbilical cord clamping has become a hot topic for obstetrics and neonatal caregivers in recent years. Midwives have been practicing delayed cord clamping (DCC) in healthy term infants for decades. In recent years it is becoming more and more apparent that there is a much larger potential benefit if cord clamping is delayed until after the lung has aerated. But how to incorporate delaying cord clamping with stabilization of infants at birth? In this practical and interactive hands-on workshop we will discuss and show important aspects of stabilizing the neonate immediately after birth, while keeping the umbilical cord intact. During the workshop we will simulate and tryout the teamwork and various workflow scenario's of performing Physiological-Based Cord Clamping with the Concord Birth Trolley in a delivery room setting.
